

NIDHI BODANA

Visual Artist

Nidhi Bodana is a multidisciplinary artist from Bagh (Dhar), Madhya Pradesh, India, based in Glasgow. Her practice spans sculpture, installation, performance, and participatory projects, where she freely experiments with diverse mediums and materials to expand the possibilities of her work. Through socially engaged and collaborative practices, she confronts urgent socio-political realities, including identity, race, discrimination, social norms, and the everyday challenges faced by marginalized and overlooked individuals. Using the body and materials as carriers of history, memory and emotional weight, her work aims to bring visibility, foster transformation, and promote healing in response to systemic injustice.
